## IN UPCOMING ISSUES...

---

### ARTIFICIAL INTELLIGENCE

- Computer-aided characterization of early cancer in Barrett's esophagus on I-SCAN magnification imaging: a multicenter international study
- Artificial intelligence for detecting and delineating the extent of superficial esophageal squamous cell carcinoma and precancerous lesions under narrow-band imaging (with video)

### COLITIS

- Usefulness of texture and color enhancement imaging in assessing mucosal healing in patients with ulcerative colitis
- Endoscopic management of patients with high-risk colorectal colitis—associated neoplasia: a Delphi study

### COLORECTAL LESIONS

- Interobserver agreement of modified Paris classification and histology prediction of colorectal lesions in patients with inflammatory bowel disease

### EUS

- Randomized trial of contrast-enhanced harmonic guidance versus fanning technique for EUS-guided fine-needle biopsy of solid pancreatic lesions
- Comparison of EUS-guided ablation and surgical resection for nonfunctioning small pancreatic neuroendocrine tumors: a propensity score matching study
- EUS-guided enterocolostomy with lumen-apposing metal stent for palliation of malignant small-bowel obstruction (with video)
- Top tips for EUS-guided evaluation and sampling of pancreatic cystic lesions
- Auxiliary diagnosis of subepithelial lesions by impedance measurement during EUS-guided fine-needle biopsy
- Analysis of variation in learning curves for achieving competency in convex EUS training: a prospective cohort study using a standardized assessment tool
- Role of through-the-scope catheter-based EUS in inflammatory bowel disease diagnosis and activity assessment

### PANCREATITIS

- Top tips for pancreatic duct strictures

### PERORAL ENDOSCOPIC MYOTOMY

- Prevalence and impact of opioid use in patients undergoing peroral endoscopic myotomy
- Impact of peroral endoscopic myotomy on high-resolution manometry findings and their association with the procedure's outcomes

### STENTS

- In-stent radiofrequency ablation with uncovered metal stent placement for tumor ingrowth/overgrowth causing self-expandable metal stent occlusion in distal malignant biliary obstruction: a multicenter propensity score–matched study
- Intraductal fully covered self-expandable metal stent versus multiple plastic stents for treating biliary anastomotic strictures after liver transplantation
- Effect of ursodeoxycholic acid after self-expandable metal stent placement in malignant distal biliary obstruction: a propensity score–matched cohort analysis
- Top tips for endoscopic biliary stenting for hilar obstruction
